

**POND™
VALUE**
It Works or Your Money Back™

Safe for fish, pond plants and all aquatic life, livestock, birds, wildlife, recreational ponds and the environment.

HOW IT WORKS: Ultimate Pond Bacteria is highly concentrated LIVE natural bacteria. Designed to reduce muck and sludge caused by rotting leaves, fish waste, waterfowl, dead algae and rotting vegetation. If this muck and sludge goes untreated, nutrients will be released into the water column causing poor water quality and foul odors. Once applied, Ultimate Pond Bacteria is active immediately and will begin to break down muck and sludge into an odorless gas that will simply escape out of the water column unnoticed. Ultimate Pond Bacteria is super concentrated and formulated for large ponds but also works great in water gardens, koi ponds and other water features.

HOW TO APPLY: Shake bottle before each use, apply product directly from container into pond – no mixing required.

WHEN TO APPLY: For best results, begin in early spring and apply when water temperatures are above 50°F.

STORAGE AND HANDLING: Keep product in original container and closed when not in use. Store in a cool, dry place. Do not allow it to freeze. Wash with soap and water after use.

WATER USE RESTRICTIONS: Ultimate Pond Bacteria may be applied to lakes and ponds used for irrigation and aquaculture.

Water treated with Ultimate Pond Bacteria may be used for recreation, fishing and other activities immediately after treatment. It may also be used in decorative water gardens, Koi ponds and other fish ponds and will not harm Koi, goldfish or ornamental plants or wildlife. Do not apply to water that will be used for human consumption.

POND & LAKE DOSAGE RATE:		
Pond Size (in acres)	Dose	Application Details
1/2	1/2 gallon	Apply every 2 to 4 weeks.
1	1 gallon	
2	2 gallon	
3	3 gallon	

1 gallon treats 1 surface acre 4-6 feet deep. Ponds with heavy muck levels and floating organics should receive treatment every 2 weeks until conditions improve.

WATER GARDEN AND KOI POND DOSAGE RATE:			
Pond Size (in gallons)	Initial Dose	Dose	Application Details
50-200	2 fl oz	1 fl oz	Apply weekly for 4 weeks, then apply monthly.
201-400	4 fl oz	2 fl oz	
401-1,000	10 fl oz	5 fl oz	
1,001-2,000	20 fl oz	10 fl oz	
2001-3,000	30 fl oz	15 fl oz	

For larger water gardens, use 1 fl oz for every 200 gallons.
